

Exercise 11: Navigate the Grid

Time:

~20 min

Location:

Barrow Hall Field

Group Size:

of People per Team: 8-9

Materials Needed:

- Combination sheets for instructors
- Cones

Description:

Cadets will have to navigate from one end of a grid to the other. The grid will be divided into 25 squares (5x5) using cones. The only way to get across is to step on each square, in the proper order. Only the GLP leaders know the proper order.

There will be 2 grid mazes side-by-side with 1 team navigating each. Whenever a cadet steps into an incorrect grid square, the entire team will have to exit the grid and report to PFOs in a “PT Penalty Box,” where they will perform an assigned exercise as quickly as possible. The teams will have to learn the maze through trial and error, and have to find a way to keep track of the correct path through the maze. The 1st team to successfully get all of its cadets through the maze/across the grid wins.

Below is an example of a maze. The start and end points are indicated to the teams, and the numbers indicate the proper order through the maze.
