

Exercise 12: Blindfold Minefield

Time:

~20 min

Location:

Barrow Hall Field

Group size:

of People per Team: 8-9

Materials Needed:

- Blindfolds (Bandanas) - 18
- Cones - 10
- Sandbags
- Paper

Description:

One team leader must guide multiple cadets from one end of a “minefield” to the other. All cadets traversing the field will be blindfolded. The mines will be designated by cones and sandbags.

Specific communication is key when maneuvering different cadets. Two competing teams will be navigating the minefield at the same time, making it necessary for cadets to ensure that they’re communicating effectively with their own team and not the competing one.

Cadets that hit a mine will remove their blindfold and proceed to a “PT Penalty Box” where they will perform exercises led by PFOs for 1 minute, following which they will reenter the minefield from the start. The 1st team to get all of its cadets through the minefield wins, or the team with the most through when time is called.

Below is an example of a minefield:
